CMD-850 Professional
World Standards Video Converter

Customer Comments on this model:

• "The converter is unbelievably good. The CMD-850 is the same class as TenLab 21"

Maciej Samsel
(Electronics and software engineer from Poland living in the USA - MSEE)

• "I wanted to thank your company for the wonderful product that you are marketing. I was thrilled to observe that there was no noticeable loss of picture quality and the product worked like a charm. I would like to thank you for the CMD-850..... "

P. A. - USA

• "Just wanted to tell you that I am really pleased with the converter. Much better than using the Samsung SV-5000W."

F. B. Ph.D. Professor, Department of Film Studies in Canada

• "..... VCR works great and the converter is a charm... We cannot tell the difference between the original and the converted images..."

Nigel F. - UK

Uses for this excellent converter:

- Tape conversion: You can exchange tapes with friends or relatives living abroad, or for business and education.
- International travel and relocation: You can use your video equipment with it while traveling or relocating to a country using a different TV system. You can install it on ships, planes and for many industrial and business applications.
- Save up to \$2000! Take your NTSC American TV overseas or bring your PAL or SECAM TV to the USA. ¹Using the high quality conversion quality of the CMD-850 to convert TV signals you can use any PAL or NTSC TV to view any type of broadcast signal in the world. Eliminating the need to buy a new multi-system TV set.
- The CMD-850 Video Converter delivers high-quality converted pictures, exceptional super-stable synchronism and superior color separation. It is ideal for tape conversion, DVD Players, Digital Camcorders, Video Editing & Capture, Multi-System VCR and Multimedia Applications.
